- Active investment management delivered by committee-based investment processes with 30 years' experience
- Three-phase strategy to capitalise on structural growth and convergence trends across Emerging Markets
- Remuneration philosophy aligns interests, provides cost flexibility and delivers employee loyalty (~40% equity owned by employees)
- 318 employees in 11 countries, with global operating hubs complemented by asset management operations in emerging countries
- High operating margin (59%) supported by scalable operating platform
- Well-capitalised, liquid balance sheet with c.£700m financial resources including c.£480m cash

AuM: diversified by investment theme & client type

Three-phase growth strategy

1

Establish Emerging Markets asset classes

Ashmore is recognised as an established specialist Emerging Markets manager, and is therefore well positioned to capture investors' rising allocations

- Developed world investors hold more than USD 100 trillion of assets and are profoundly underweight Emerging Markets; target allocations are less than 10% compared with global benchmark weights of approximately 10% to 30%

2

Diversify investment themes and developed world capital sources

Ashmore is diversifying its revenue mix to provide greater revenue stability through market cycles. There is particular focus on growing intermediary retail, equity and alternatives AuM

- The Emerging Markets investment universe continues to grow and diversify, and Ashmore strives to be at the forefront of accessing new market opportunities as they arise
- Diversifying revenue streams provides greater stability through market cycles

3

Mobilise Emerging Markets capital

Ashmore's growth is enhanced through accessing rapidly growing pools of investable capital in Emerging Markets

- Industry AuM in Emerging Markets is growing twice as fast as the developed world
- This presents a significant growth opportunity in local asset management platforms, as well as cross-border Emerging Markets opportunities over the longer term

Strategy phase 1: Establish Emerging Markets asset classes

- Ashmore’s specialist focus means it is well-placed to exploit the significant growth potential as emerging nations develop
- Large investable markets across fixed income, currencies, equities and illiquid assets
- Institutional allocations are underweight and rising steadily
 - Typically mid-single digit % allocation to Emerging Markets, increasing over time and on a growing pool of capital
 - MSCI All Cap World index has 12% EM weight
 - JP Morgan GBI-Agg Diversified index has 30% EM weight
- Allocations will increase as Emerging Markets are increasingly viewed as mainstream asset classes

Ashmore’s specialism, expertise, experience and distribution model enable it to grow AuM by participating in rising investor allocations to Emerging Markets

Convergence: GDP per capita (indexed 1980 = 100)

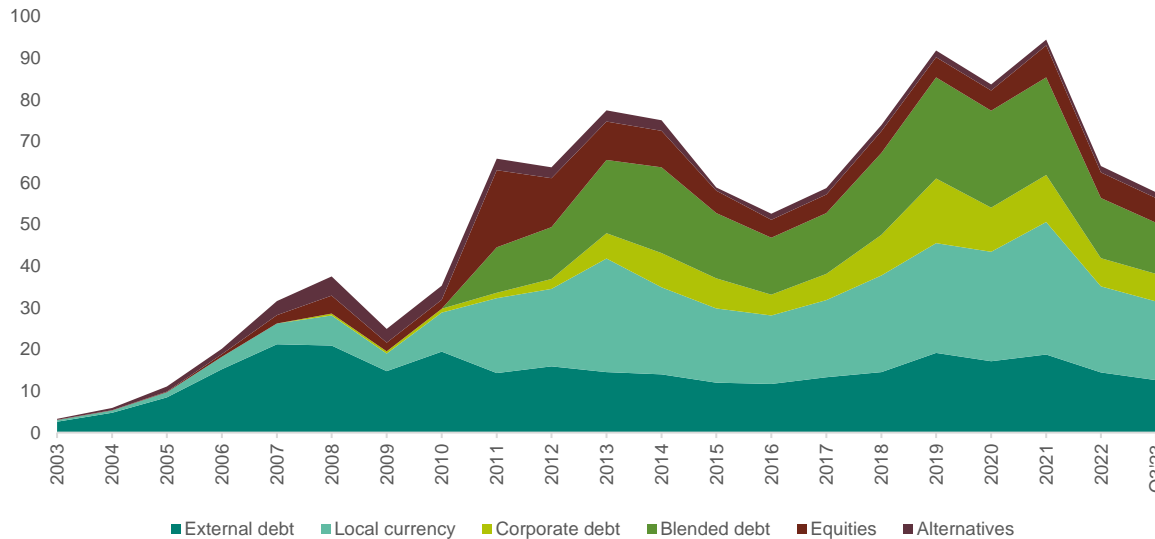

Significant growth opportunity from higher allocations (%) ¹

(1) Ashmore, annual reports of representative European and US pension funds collectively responsible for more than US\$750 billion of assets

Strategy phase 2: Diversify assets under management

AuM development (USD bn)

AuM by client type & location

Focus on further diversification by growing:

- Equities (10% AuM)
- Intermediary retail (4% AuM)
- Alternatives (2% AuM)

Potential development opportunities in:

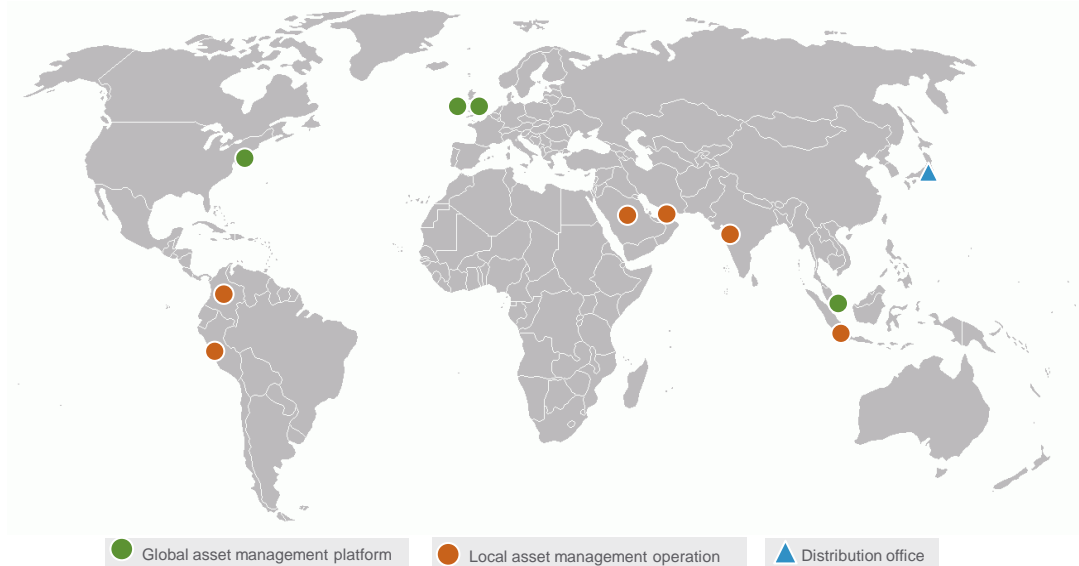

- IG fixed income (9% AuM)
- Dedicated ESG strategies (4% AuM)

Client AuM data as at 31 December 2022

Strategy phase 3: Mobilise Emerging Markets capital

- Investable capital pools in Emerging Markets are growing faster than in Developed Markets
- Ashmore's local offices participate in this growth trend
 - Strong organic growth opportunity in each market and further diversification possible
 - Potential to expand network over time
- Resilient performance and diversification benefit, collectively manage US\$6.6bn AuM

Established network of six local offices

Increasing contribution to Group performance

	FY2010	FY2020	H1'23
Headcount	45	97	113

EBITDA (£m)	3	15	9
- % Group	(1%)	(7%)	(14%)
EBITDA margin (%)	33%	48%	46%

Ashmore will continue to develop its network of local businesses, and target larger EM institutions, to increase proportion of AuM from EM-domiciled clients from 30% today

Active investment processes

- Specialist, active investment management is required to exploit inefficiencies in Emerging Markets
- Investment committees oversee experienced teams with collective responsibility for strategies in each theme
 - No 'star' culture
- ~100 investment professionals covering global EM fixed income & equities and local asset management
- Proprietary research including ESG scoring for all portfolios
- No prescribed house view, but insights shared between global and local investment teams

Investment themes

Ashmore manages capital across a range of different investment themes with dedicated strategies under each theme providing either global Emerging Markets exposure or specific regional or country exposure.

Distinctive business model

Structural growth opportunities

High-return, diversified range of Emerging Markets asset classes

Powerful political, social and economic convergence trends

Investor allocations have to increase significantly to match global index weights

Creating value through the cycle

Strong long-term investment performance for clients

- Consistent investment philosophy since 1992
- Significant alpha delivered through market cycles

Interests aligned through employee equity ownership

- Variable remuneration biased towards long-dated equity awards
- Employee equity ownership is approximately 40%

Value for shareholders

- 59% adjusted EBITDA margin
- Strong cash generation
- Progressive dividend policy

Delivering returns for shareholders through market cycles

- Financial performance driven by high-quality revenues and highly flexible cost base
 - Strong bias to recurring management fee income
 - Disciplined control of operating costs
 - Profit-based variable remuneration with a cap
- Delivers high EBITDA margin through the cycle and consistent cash generation
- Remuneration philosophy aligns interests of clients, shareholders and employees through long-dated equity ownership
- Team-based culture mitigates key man risks
- Well-capitalised, liquid balance sheet supports strategic and commercial initiatives

Profitability maintained through cycles

Disciplined control of operating costs (£m)

Focus on strategic initiatives

1. Equities

- Strategic objective to increase % of AuM in equity funds (10% currently)
- Equities AuM (US\$6bn AuM) has three main components:
 - global products (e.g. All Cap, or traditional GEM equity funds, and Active Equity): c.25% AuM / US\$1.5bn
 - locally-managed products for domestic investors: c.35% AuM / US\$2bn
 - locally-managed products (single country/regional) for international investors: c.40% AuM / US\$2.5bn
- Greatest scale potential is in global products; achievement of strategic objective relies on growing these strategies
 - investment in All Cap team in 2017, delivering strong performance: +4.5% annualised alpha over 3yrs and 5yrs
 - established Active equity strategy
- Equity AuM and flows have proven more resilient than fixed income, due to better relative performance and significant equity AuM managed in local businesses

Equity AuM as % of Group AuM

Equity & fixed income net flows (US\$bn)

Focus on strategic initiatives

2. Intermediary retail

- Intermediary retail AuM provides diversification and financial benefits, albeit with typically greater market/performance sensitivity (i.e. focus on positive beta) than institutional capital
- Intermediary distribution provides access to higher end of retail market and uses appropriate cost model
- After several years of market / performance headwinds and net outflows, AuM is 4% of Group; strategic ambition to return to 15%+ share
- Representative product range available on scalable mutual fund platforms, other distribution structures can be considered
 - SICAV: 30 funds, US\$4.7bn AuM
 - 40-Act: 12 funds, US\$1.0bn AuM

Diversified intermediary retail AuM

Remuneration philosophy

- Consistent philosophy aligned with cyclical profits and protects returns to shareholders through market cycles
- Applies to all Group employees, underpins strong team-based culture and employee retention
- RemCo determines awards for Directors but also significant number of senior employees

Principal features

- Low salary cap
- Single profit-based bonus pool capped at 25%
- No separate LTIP
- Performance-based awards, taking both firm and individual performance into account

Strong alignment of interests over long-term

- Compulsory minimum deferral into equity with five-year vest
- Opportunity for employees to forgo cash in return for equity
- Restricted shares entitled to ordinary dividends
- Employee benefit trust purchases shares to mitigate dilution

Clear link between pay and performance

Equity deferral and opportunity to increase alignment

Strong balance sheet & consistent cash generation

- Strong, liquid balance sheet benefits clients and shareholders through the cycle
 - no debt
 - high-quality financial resources, c.£700m
 - capacity to invest in seed capital for future growth
 - confers strategic flexibility, e.g. to consider M&A
 - progressive dividend policy
- Business model converts operating profits to cash
 - 110% cumulative conversion since IPO
 - consistent cash balance, average ~£430 million over past decade
 - paid £1.6 billion ordinary dividends since IPO, equivalent to 68% of attributable profits

Substantial & liquid financial resources

Consistent, coherent approach across the Group

- ESG Committee includes front office, middle office & support functions

Corporate

- Premium listing on London Stock Exchange
- UNPRI signatory since 2013
- Annual commitment to society: 0.5% of PBT donated to The Ashmore Foundation and other charities
- Net zero initiative implemented via The Ashmore Foundation

Investment

- ESG factors integrated into all investment processes
- Dedicated ESG funds in equities, external debt, corporate debt & blended debt
- Proprietary ESG research
- No separate ESG team; fund managers have a comprehensive view of issuers
- Participation in industry initiatives, e.g. NZAMI, CA100+

Society

- The Ashmore Foundation has partnered with >75 local organisations in 26 emerging countries

Integrated approach: three pillars of sustainability

Emerging Markets

Emerging Markets

Structural growth and investment opportunities in inefficient markets

- Growth underpinned by powerful economic convergence trends with the developed world
- Large investment universe, set to grow further
 - US\$79trn in equities and fixed income, of which only US\$5trn is hard currency sovereign/corporate bonds
 - 156 developing countries, approximately half of which have not issued tradable debt
- Low index representation
 - Only 15% of bonds and 17% of equity market cap are in benchmark indices
 - Opportunities for active management, and rising indexation drives higher allocations
- Local currency funding
 - More than 85% of funding is through local bond issuance
 - Important development that increases resilience of Emerging Markets, needs high-quality policy making
- Underweight allocations
 - EM is 12% to 30% of global benchmarks, and rising, but investors typically have <10% allocations

Emerging Markets' increasing significance

84%

of the world's population lives in an emerging country, and the demographics are typically more favourable than in developed countries

58%

of the world's GDP is generated by emerging countries. Future growth is underpinned by low GDP per capita levels that are converging with developed countries

+5%

CAGR GDP capita growth between 2000 and 2021, compared with +3% for the developed world

72%

of the world's foreign exchange reserves, or nearly US\$10 trillion, are controlled by emerging countries' central banks

12% to 30%

weighting of Emerging Markets in global benchmark indices, rising over time as markets grow and become more accessible

Emerging Markets Diversification

- Diverse equity & fixed income asset classes representing more than 70 countries
 - No country is more than 5% of EMBI GD
 - GBI-EM GD country weights capped at 10%
- The majority of assets are local currency denominated (bonds and equities), owned & traded in domestic markets
- Investment grade issuance increasingly relevant in external debt markets
 - 51% of EMBI GD & 56% of CEMBI BD
- Fundamentals underpin long-term returns, but sentiment / DM factors can unduly affect prices in short term
 - Active management can exploit inefficiencies
- Ashmore's active investment philosophy reflects the huge diversity of opportunities available across Emerging Markets
 - Invested in c.80 countries

Large and diverse benchmark indices

Index	Value (US\$bn)	Countries	Issuers
EMBI GD	1,080	70	160
GBI-EM GD	2,920	20	20
CEMBI BD	1,055	59	763
MSCI EM	5,250	24	1,377

Wide range of returns available (12m to Dec 2022)

Emerging Markets Active versus passive investing

- EM fixed income and equity markets are inefficient
 - Benchmark indices are unrepresentative of the investment opportunity
 - Active management is critical
- Structural developments, e.g. removal of capital controls, will increase index representation over the long term
 - Will lead to more passive substitutes
 - But also support higher allocations as the asset classes are increasingly viewed as ‘mainstream’

Large investment universe, low index representation

Emerging Markets outlook

- 2022 macro headwinds receding, several factors underpin potential for EM outperformance
 - China policy stimulus will have broader positive impact
 - EM inflation moderating following effective rate hikes
 - EM GDP growth premium expanding in 2023 & 2024
 - Fed hiking cycle is close to an end
- Ukraine war is ongoing: its outcome, and the impact on broader geopolitical risks, remain highly uncertain
- EM valuations are at oversold levels and significant discounts to DM assets
 - Countries on the sidelines of geopolitical conflicts, mostly in EM, should trade at a premium
- IG bonds performing well, equities and HY likely to outperform as risk appetite increases
